Art Unit: 1642

#### **DETAILED ACTION**

1. Claims 1-7, 9-11, 13, 15-16, 18-24, 26-37 are pending.

Claims 1, 9, and 15 have been amended.

Claims 1-7, 9-11, 13, 15-16, 18-24, 26-37 are under examination.

- 2. The text of those sections of title 35, USC Code not included on the Office Action can be found in a prior Office Action.
- 3. The following Office Action contains some NEW GROUNDS of rejection

### **Drawings**

4. The drawing corrections are acknowledged.

## Information Disclosure Statement

5. The information Disclosure statement filed 2/26/01 has been noted, however, none of the references were provided. The patents cited as references 1-31 have been considered. All other references will be considered when the references are provided.

## Rejections Withdrawn

Art Unit: 1642

6. The rejection of claims 1-30 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in view of the amendments to the claims and arguments.

- 7. The rejection of claims 1-37 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5, 8, 10, 15, 18, 19, 21, 24, 25, and 30-35 of copending Application No. 09/234182 is withdrawn in view of the terminal disclaimer filed 2/26/01.
- 8. The rejection of claims 1-37 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 and 28-31 of copending Application No. 09/355014 is withdrawn in view of the terminal disclaimer filed 2/26/01.
- 9. The rejection of claims 1-13, 15-16, 18-24, 26-33, 36-37 under 35 U.S.C. 103(a) as being unpatentable over Faanes et al (U.S. Patent 5,695,760, filed 4/24/95) is withdrawn in view of the amendments to the claims.
- 10. The rejection of claims 1-13, 15-33, 36-37 under 35 U.S.C. 103(a) as being unpatentable over Faanes et al (U.S. Patent 5,695,760, filed 4/24/95) and further in view of Zapata et al (FASEB J. 9:A1476, 1995) is withdrawn in view of the amendments to the claims.
- The rejection of claims 1 and 34-35 under 35 U.S.C. 103(a) as being unpatentable over Faanes et al (U.S. Patent 5,695,760, filed 4/24/95) and further in view of Harlow et al (Antibodies A Laboratory Manual, Cold Spring Harbor Laboratories, pp 324-339, 1988) is withdrawn in view of the amendments to the claims.

Art Unit: 1642

# Response to Arguments

12. The rejection of claims 1-7, 9-11, 13, 15-16, 18-24, 26-37 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention is maintained and made again.

Claim 1 has been amended to recite limitations of canceled claim 14 which was originally rejected in this rejection in the previous Office Action.

The response filed 2/26/01 has been carefully considered but is deemed not to be persuasive. The response cites references of McCafferty et al (Nature 348:552-554, 1990) and Hollinger et al (PNAS 90:6444-6448, 1993) to provide evidence that a disulfide bond between the light chain and the heavy chain is not needed for antigen binding. In response to these arguments, the cited references are not commensurate in scope with the claims. While it is known in the art that scFv and diabodies do not contain a disulfide bond covalently associating the light and heavy chains, the claims recite antibody fragments that do not contain a disulfide bond but contain a non-proteinaceous polymer linked to a cysteine residue in the light or heavy chain. The claims are not drawn to a scFv or diabodies as required in the claims. The importance of the interchain disulfide bond is underscored by Haber (Biochemistry 52:1099-1106, 1964) which states that the two peptide chains are held together by a single disulfide bridge and incorrect position of the interchain bridge may result in an inactive conformation (see page

MA

Art Unit: 1642

to functional assembly of the antibody as removal of the Cys128 did not lead to functional assembly of the L chain and stable association between the H and L chains (see page 153, left column). As stated in the previous Office Action, the specification fails to teach an example where the disulfide bond linking the cysteine residues in the light or heavy chain is substituted for an amino acid and the cysteine is covalently coupled to a nonproteinaceous polymer that results in a functional antibody.

Thus, undue experimentation would be require to make and use the instantly claimed antibody fragments.

# The following is a NEW GROUND of rejection.

- 13. Claims 1-7, 9-11, 13, 15-16, 18-24, 26-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- a. Claims 1-7, 9-11, 13, 15-16, 18-24, 26-37 are indefinite for reciting "portion of a parental antibody" in claim 1 because the exact meaning of the phrase is not clear. Does the phrase mean a heavy and light chain and an amino acid residue, or a light and heavy chain and a Fc region, etc?

#### **Conclusions**

Art Unit: 1642

14. No Claims are allowed. U.S. Patent 6,133,426 is not being used as prior art because the disclosure of antibodies and conjugates of non-proteinaceous polymer wherein the cysteine residue in the light or heavy chain is conjugated to a polymer is not enabled (the claims in 6,133,426 are not directed to this subject matter).

15. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Larry R. Helms, Ph.D, whose telephone number is (703) 306-5879. The examiner can normally be reached on Monday through Friday from 7:00 am to 4:30 pm, with

Art Unit: 1642

alternate Fridays off. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.

17. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 305-7401.

Respectfully,

Larry R. Helms Ph.D.
